COGBILL PIPE FABRICATION SERVICES

Cogbill's experienced and skilled craft pipe fabricators, welders and fitters are capable of producing high quality, customized piping systems. Our fabrication facility and our teams consistently complete complex configurations in a wide range of sizes, from 1/2" - 72" diameter piping, using materials that include carbon steel, stainless steels, and exotic alloys. All our work is performed under the guidelines established by ASME. Our fabrication capabilities include pipe cutting, bending, beveling, and welding.

Cogbill's production department has NCCER-certified pipe fitters with experience in ASME B31.3 Process Piping, and pipe welders certified per ASME Section IX for numerous processes, including SMAW, GTAW, GMAW, and FCAW, as well as combination processes. We are fully capable of producing turnkey piping systems that include pipe supports and all needed accessories, including hold down clamps, pipe shoes, wear pads, Repads, hangers, among many others, making us an ideal one-stop shop for all your piping systems' needs.
