Serving the oil and gas industry since 1999, Cogbill excels in pipe support systems fabrication. We provide turnkey solutions to ensure the highest quality products from concept to completion. Our team will coordinate, design, fabricate and deliver an unmatched product that meets or exceeds your custom specifications. Our RedLineIPS piping products support piping systems 2" to 72" in size, fabricated from carbon, stainless, or galvanized steel. RedLineIPS non-metallic wear pads and other composite liners are also available to protect your piping systems from corrosion and vibration, in various dimensions and thicknesses to accommodate your specific needs.
